Indicator	Performance Target	Sub-indicator	Methodology
Indicator 1: No. of people trained in psychosocial support, by sex	• 200 people (approximately evenly split male and female) trained in psychosocial disaster response e.g. have completed a 50-hour program. (100 in Bogor + 100 elsewhere) • 280 people (approximately evenly split male and female) participate in 12 ongoing supervision sessions (200=80+100+100) • 80 people participate in Leadership Training 2015-16 (40 people from Bogor, 40 people from elsewhere)	Absolute number of participants by sex	Database maintained in excel tracking participants in courses, supervision sessions, and leadership trainings
Indicator 2: Recorded instances of applied training in disaster situations	• Those who receive training in psychosocial support apply their skills in disaster situations affecting their communities. • Those who receive training in psychosocial support feel more confident in their capacity to assist disaster affected communities in disaster situations as well as in the recovery stage.	Instances of disasters, number of responders, and number of village beneficiaries, name of village	Field observations during the post-disaster response and tracking of the number of times trained volunteers were asked to assist following personal and natural disasters
JDC Indicator 1: The development, implementation, publication and promotion of a curriculum	• A curriculum, already designed in Phase I to develop psychosocial skills and capacity will be revised and improved based on field testing and feedback from trainers and trainees through intense collaboration between Indonesian partners and JDC experts and then implemented and promoted for inclusion in other Emergency Management and DRR training programs.	N/A	Training curriculum developed by bi-national development team, implemented in four additional villages as well as the existing four villages, and offered to national emergency agencies for adoption
JDC Indicator 2: The number and percent of beneficiaries	• Upgraded skills of 100 trainers and supervisors • 80 Committed local village based facilitators (total from 2013-2016) for training community members in psychosocial response.		Follow-up supervision questions, surveys, participant feedback, field observations and end-line program assessment

Indicator	Performance Target	Sub-indicator	Methodology
retaining disaster preparedness, mitigation and knowledge management	• 12,000 people participate in programs run by graduates of these trainings		
JDC Indicator 3: The inclusion of psychosocial response in DRR	• Agreement for inclusion of psychosocial training in National Program, including formal adoption of training curriculum. • 600 people participate in one-day training sessions for policy makers and other DRR programs. • 150 professionals participate in Conference and can disseminate knowledge • Relevant University of Indonesia faculties join partnership to advocate for psychosocial response • USAID Grantees join partnership to advocate for psychosocial response and make new partnerships • A series of meetings will be held with interested parties regarding the arts and the media and grants will be given for the development of the preferred initiatives to be developed	Psycho social support mechanisms are integrated into national DRR programs There is a national network of people and organizations (including USAID grantees) who understand the importance of psycho social support, its methodologies and advocate for it nation-wide There is public awareness of DRR and psycho social needs	Program monitoring & tracking via excel worksheet, focus groups, surveys, participant feedback, field observations and end-line program assessment
JDC Indicator 4: Crisis Center capacity enhanced	• The Crisis Center will become a national resource for psychosocial training in DRR	Number/frequency of people/organizations that approach the Crisis Center for information and referrals	Program Monitoring and tracking via excel worksheet
